

Metafix

PRODUCT INFORMATION BULLETIN

AquaStop Automatic Flood Prevention

Exclusive to Metafix, the **Aquastop** is an automatic valve which shuts off the water supply to any appliance connected to mains water in the event of a leak.

This ingenious electronic device connects between the mains water supply and any water drawing appliance.

Operated by a single AA battery (supplied), the **Aquastop** has an external sensor which continuously monitors the floor area around your appliance.

In the event of a leak the **Aquastop** instantly switches off the mains water supply eliminating serious flood damage and saving £££.

Uses include:

- ◆ Photo-processors
- ◆ Chemical Mixers
- ◆ Plate Processors
- ◆ Washing Machines
- ◆ Dish Washers

In fact anything connected to a water supply.

Installation takes seconds, simply undo your washing machine hose from the wall, screw on Aquastop and re-connect the hose. Lay the sensor on the floor next to your appliance and you are protected!

“Metafix, sensible solutions to protect your environment and peace of mind”
